

Activity Event report: Lollapalooza India 2025

Date: 8th and 9th March, 2025

Venue: Mahalaxmi Racecourse, Mumbai.

Introduction: Nanavati Max Super Speciality Hospital, in collaboration with the Sunandan Divatia School of Science (Physiotherapy Department) at NMIMS University, proudly served as the medical partner for the highly anticipated Lollapalooza Musical Event 2025. Held on the 8th and 9th of March, this partnership aimed to ensure the health and safety of all attendees, performers, and staff during the two-day festival.

Event Overview: Lollapalooza, the legendary music festival, made its return to Mumbai for the 2025 edition, bringing together a diverse mix of musical genres and high-energy performances. Hosted at a vast venue, the event attracted thousands of music lovers from across the country, offering an unforgettable experience with an eclectic lineup that spanned rock, pop, hip-hop, and electronic dance music.

The Medical Team: As the official medical partner for the event, Nanavati Max Super Speciality Hospital and the physiotherapy department of NMIMS University played a pivotal role in ensuring the safety and well-being of everyone involved. A dedicated team of healthcare professionals, including doctors, nurses, and 15 physiotherapists, were deployed onsite to provide immediate medical assistance as needed.

Medical Facilities and Services: A fully equipped medical center was set up at the venue, which included emergency treatment rooms, first-aid stations, and ambulance services to ensure swift responses to any medical emergencies. The physiotherapy department made significant contributions by providing highly skilled medical volunteers and resources, which enabled the healthcare team to deliver effective and timely care.

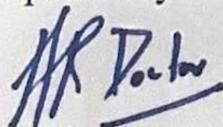

Health and Safety Measures: The event saw 15 physiotherapists deployed across the venue, working in close collaboration with doctors and nurses. These professionals were stationed at six satellite stations strategically located throughout the venue, ensuring rapid access to first-aid services. Additionally, three ambulances were stationed near key stages to provide quick transport in case of any serious medical emergencies. Nanavati Max Super Speciality Hospital and NMIMS University worked seamlessly with event organizers to implement these health and safety measures.

Deployment Plan:

- **Main Tent:** The primary medical center was located in the main tent, fully equipped with medical supplies to handle emergencies and provide comprehensive care. One physiotherapist were stationed here to triage patients, conduct initial assessments, and coordinate medical responses.
- **Satellite Stations (6):** Six satellite stations were established at various points across the event area, ensuring immediate access to medical care for attendees. Each station was staffed with a physiotherapist trained in first aid and emergency response, ready to assist as needed.
- **Ambulance Teams (8):** Eight ambulance teams, each with one physiotherapist, were stationed near different stage exits, on standby to transport attendees requiring further medical care to Nanavati Max Super Speciality Hospital, if necessary.

Conclusion: The physiotherapy department of NMIMS University, as a key medical partner, played an essential role in ensuring the safety and well-being of all those attending the Lollapalooza Music Festival 2025. Their collaboration with the medical team was crucial in providing comprehensive care, with physiotherapists working alongside doctors and nurses to address any health concerns that arose during the event. This partnership contributed greatly to the overall success of the festival, ensuring attendees could enjoy the vibrant musical experience with the confidence that expert medical care was readily available.
